Claim Listing

1. (Original) A nanocomposite surgical material comprising:
 - (a) a polymer matrix; and
 - (b) nanoencapsulated solid filler dispersed within the polymer matrix to produce a composite surgical material having an average matrix ligament thickness of less than about 1000 nanometers.
2. (Original) The nanocomposite surgical material of Claim 1 wherein the average matrix ligament thickness is less than 750 nanometers.
3. (Original) The nanocomposite surgical material of Claim 1 wherein the average matrix ligament thickness is less than 500 nanometers.
4. (Original) The nanocomposite surgical material of Claim 1 wherein the average matrix ligament thickness is less than 300 nanometers.
5. (Original) The nanocomposite surgical material of Claim 1 wherein the polymer matrix is non-biodegradable.
6. (Original) The nanocomposite surgical material of Claim 5 wherein the polymer matrix includes an acrylic polymer.
7. (Original) The nanocomposite surgical material of Claim 1 wherein the polymer matrix is formed by polymerizing a pre-polymerized polymer component and a monomer.

8. (Original) The nanocomposite surgical material of Claim 7 wherein the pre-polymerized polymer component is poly(methyl methacrylate), poly(methyl methacrylate-co-styrene) or any combination thereof, and the monomer is methyl methacrylate.
9. (Original) The nanocomposite surgical material of Claim 1 wherein the nanocomposite surgical material is in the form of a pre-polymerized surgical implant.
10. (Original) The nanocomposite surgical material of Claim 1 wherein the polymer matrix is biodegradable.
11. (Original) The nanocomposite surgical material of Claim 10 wherein the polymer matrix includes polylactic acid.
12. (Original) The nanocomposite surgical material of Claim 10 wherein the polymer matrix includes polyglycolic acid.
13. (Original) The nanocomposite surgical cement of Claim 10 wherein the nanocomposite surgical material is in the form of a prepolymerized surgical implant.
14. (Original) The nanocomposite surgical material of Claim 1 wherein the nanocomposite surgical material is a surgical cement.
15. (Original) The nanocomposite surgical material of Claim 1 wherein the nanoencapsulated solid filler has radio-opaque properties.
16. (Original) The nanocomposite surgical material of Claim 1 wherein the nanoencapsulated solid filler has an average mass diameter which is less than 1000 nanometers.

17. (Original) The nanocomposite surgical material of Claim 1 wherein the nanoencapsulated solid filler has an average mass diameter ranging from about 750 nanometers to about 1 nanometer.
18. (Original) A nanocomposite surgical material comprising:
 - (a) a polymer matrix; and
 - (b) nanoencapsulated solid filler dispersed within the polymer matrix to produce a composite surgical material;
wherein the nanoencapsulated solid filler has an average mass diameter of less than 1000 nanometers.
19. (Original) The nanocomposite surgical material of Claim 18 wherein the nanoencapsulated solid filler has an average mass diameter ranging from about 750 nanometers and about 1 nanometer.
20. (Original) The nanocomposite surgical material of Claim 18 wherein the nanoencapsulated solid filler has radio-opaque properties.
21. (Original) A powder for preparing a nanocomposite surgical material comprising a polymer matrix and a nanoencapsulated solid filler having an average mass diameter which is less than 1000 nanometers.
22. (Original) The polymeric powder of Claim 21 wherein the polymer matrix comprises poly(methyl methacrylate), poly(methyl methacrylate-co-styrene) or any combination thereof.
- 23-37. (Cancelled)
